Work Experience

Client Services Support Intern — 2026

General Motors — *Oshawa, ON*

- Worked on call centre 2026 network refresh project alongside infrastructure specialists. Installed hardware, cabling, and managing device templates. Worked with Opengear OOBA, Cisco ASR 1000 series routers, 9000 series Catalyst switches, and older 6500 chassis.
- Contributed to various network upgrade projects, including test track, firewall appliance & application server reconfiguration, switch imaging and troubleshooting.
- Took on self-guided projects such as 3d printing and network infrastructure provisioning, including racking new Dell R660 servers, performing cable and documentation duties.

Fibre Optic Technician — April 2023 – Present

Bell Canada (Bell Technical Solutions) — *Durham, ON*

- Installing, configuring, and repairing fibre optic FTTH networks — internet, IPTV, and home phone — including central splitting points, and copper/fiber splicing.
- Working with customers to neatly cable and configure their home networks for custom needs in all environments, rain or shine.

Education

Computer Systems Technology — Jan 2024 - Est. April 2027

Durham College (6 semesters), Advanced Diploma — *Oshawa, ON*

Program focused on IT systems and business solutions for industry. Key courses include hardware, data communications, databases, web dev, software, virtualization, Linux, PowerShell, and cyber security.

Skills

- Networking, copper & fibre splicing
